

24,489 HYDRA® PIPE SUPPORTS FOR NEW CHEMICAL PLANT

Application

Building of a new acetylene plant; Germany

Technical data

- 24,489 HYDRA pipe supports (spring hangers, dynamic components, sliding and roller supports)
- Nominal diameter DN: 25 to 1600
- Total scope of supply approx. 412 t

Special Features

- Function-oriented special design, including among other things, standardised/specific clamping systems and dynamic components/sway struts
- Implementation according to customer factory standard and customisation to differing requirements
- Partially designed for low-friction sliding in various installation heights, partially adjustable in height
- Hot-dip galvanised design for long service life

Ready for installation: spring supports FSP – preadjusted and pre-finished

Galvanized pipe bearings in a wide range of designs for shipping in accordance with customer guidelines

Vertical clamp with connecting elements (hot-dip galvanised)

Special customer requirements in welding-related batch production
